COVID-19 Statistics

As at 22 June 2020

A Management Information publication for Scotland

Publication date: 24 June 2020

About this release

This weekly release by Public Health Scotland presents data on COVID-19 across NHSScotland.

As at 15 June the total number of cases, positive and negative, includes results from tests carried out across any NHSScotland Laboratories and UK government Regional Testing Centres.

Main Points

• Between 28 May to 21 June 2020, 1,245 cases were recorded in the contact tracing software, from which 1,551 contacts have been traced.

From 28 May to 21 June, 1,245 cases were recorded in contact tracing software, from which 1,551 contacts have been traced.

• As at 22 June 2020, there have been 18,170 confirmed COVID-19 cases, equating to 333 confirmed cases per 100,000 population.

• Between 1 March 2020 and 17 June 2020, there had been 5,886 admissions to hospital with a laboratory confirmed test of COVID-19.

• As at 21 June 2020, 519 confirmed COVID-19 patients have been treated in an Intensive Care Unit.

• As at 22 June 2020, 215,365 people in Scotland have tested negative.

Wider Impact Detailed Analysis

The response to the COVID-19 pandemic is likely to have a wider impact on health and care as a result of the lockdown, economic pressures and changes to health services.

A range of analyses on the impact of COVID-19 across aspects of NHS Scotland is available on the interactive information tool.
Background

On 1 March 2020, the first person in Scotland was tested positive for COVID-19. On the 17 March NHS Scotland was placed in an emergency footing by the Cabinet Secretary. Schools have been closed since 20 March and the country has been in lockdown since 23 March. Scotland entered phase one of easing out of lockdown on Friday 29 May 2020 and began the first stage of phase two on 19 June. Since the start of the outbreak, Public Health Scotland (PHS) has been working closely with the Scottish Government and health and care colleagues to support the surveillance and monitoring of COVID-19 amongst the population. There is a large amount of data being regularly published regarding COVID-19 (for example, Coronavirus in Scotland – Scottish Government and Deaths involving coronavirus in Scotland – National Records of Scotland). This report complements the range of existing data currently available.
