General Practice – Demographics Data Visualisation

An Official Statistics release for Scotland (Experimental)

Publication date: 25 August 2020

About this release

This release by Public Health Scotland shows a data visualisation of a range of GP practice demographics data, broken down at practice, HSCP, Board and Scotland level. The most recent data presented is up to 30 June 2020.

The visualisation shows practice list sizes broken down by age, sex and deprivation (SIMD). It also highlights changes in practice populations between quarters, the number of patients registered in the last year and patients living in care homes.

Main Points

The data visualisation is available to view here.

The data behind this dashboard is also available to download from the data files section of this page.

Further Information

For trend analysis of the GP work force and practice list sizes please see the annual GP Workforce and Practice List Sizes publication.

Lists of all GPs and practices in Scotland are updated quarterly on the General Practice web page.

PHS and Official Statistics

Public Health Scotland (PHS) is the principal and authoritative source of statistics on health and care services in Scotland. PHS is designated by legislation as a producer of ‘Official Statistics’. Our official statistics publications are produced to a high professional standard and comply with the Code of Practice for Statistics. Further information about our statistics.
